User stays logged-in in a different page

The image shows a web browser window with a profile page on the left and the Chrome DevTools developer tools on the right.

Profile Page (Left):

- Greeting: **Hello, Nara**
- Message: **Welcome to your profile!**
- Bio section: A text input field containing "Tell us about yourself" and a button labeled "Update Bio".
- Books section: A heading **Add Your Favorite Books!**, a text input field labeled "Book Name:" containing "Enter book name", and a button labeled "Add Book".
- Table: A table with two columns, "Book Name" and "Action".

Developer Tools (Right):

- Elements:** The DOM tree shows the `body` element selected.
- Styles:** The `element.style` panel is empty.
- Console:** The console shows the following log messages:
 - Logged in user: `nsmacias2@miners.utep.edu` (link to `auth.js:21`)
 - User data: (link to `auth.js:41`)
 - `{lastname: 'Macias', firstname: 'Nara', timestamp: Timestamp}`
 - `i` (expanded object):
 - `firstname: "Nara"`
 - `lastname: "Macias"`
 - `timestamp: Timestamp {seconds: 1741555191, nanoseconds: 236000}`
 - `[[Prototype]]: Object`

Profile of the user

The image shows a web browser window with a user profile page and the Chrome DevTools console open.

Web Page Content:

- Greeting: **Hello, David**
- Welcome message: **Welcome to your profile!**
- Bio section: A text input field with the placeholder "Tell us about yourself" and a label "Bio:". Below it is an "Update Bio" button.
- User bio: **Bio: I like to read manga.**
- Books section: **Add Your Favorite Books!**
- Book form: A label "Book Name:" followed by a text input field containing "Enter book name" and an "Add Book" button.
- Table:

Book Name	Action
Naruto	Delete

Chrome DevTools Console:

- Tab: **Elements**
- Selected element: **body**
- Styles pane: Shows `element.style { }`
- Console pane: Shows the message **Book form submitted** and the log entry **Adding book: Naruto for user: gj00hQNTNuVIQfN05VcZ4tvpa9n1**.
